### Patch Directions

#### Urbandale Soccer Club - Sporting Kansas City Patch Information

The Urbandale Soccer Club announced this summer a new relationship with the Major League Soccer team Sporting Kansas City, as an academy affiliate.

As part of our new relationship, the club is asking parents to attach a Sporting Kansas City patch to the right sleeve of your children's jerseys. Your child's coach has the patches and will be giving two to each player at one of the first practices.

Parents, please attach the patch to the right sleeve of each jersey (right sleeve as if the child had the jersey on). The patches are iron-ons, so please set your iron to the hottest temperature (cotton/wool) and hold the iron on the patch on the right sleeve for 20-25 seconds. See the picture below for sleeve placement suggestion.

When washing, use the delicate cycle and line dry. If for some reason your patch falls off, please see your club/team administrator for a replacement.

If for some reason the patches fall off during the season, please let the club know.

#### SCN Patch Application Examples:

#### Few tips we received from the members who got this done already:

- Using a protective cloth of any kind like a tin non-colored cloth or towel helps protect jersey from direct exposure to the iron and potential damage to the jersey.
- Reducing the hold time to 20 seconds, (instead of 20-25) seems to work just fine.
- Above tips are even more important if you have one sided jerseys.
