USA BAT LAUNCH INFO

- USA Baseball is implementing a new bat standard that will take effect January 1, 2018
 - Before Jan 1, current bats AND USABats will be legal on fields
 - After Jan 1, all players will need to use a new USA Baseball certified bat with the stamp shown to the right on the barrel:
- Why: This new standard will promote a more wood-like bat performance, leading to a safer and more universal game across leagues
- All leagues will now allow 2 5/8" bats for play, therefore the majority of the new bats will be 2 5/8 barrels and all performance bats will only come in 2 5/8" (no more 2 1/4" performance bats)
- The performance of the new bats will continue to be relative to the new standard, meaning that the top of the line bats will still offer maximum performance under the new standard
- See the chart on the right for information on bat types:
- See below for leagues that will be following the new USABat standard:

1-PIECE ALLOY BATS

- Performance alloy barrel provides more pop
- 1-piece design allows for more speed behind the ball at contact
- Balanced weight distribution for lighter feel

2-PIECE ALLOY BATS

- Performance alloy barrel allows for more pop
- Composite handle provides more whip and power
- Provides slight end-loaded feel

2-PIECE COMPOSITE BATS

- Composite material allows for extended barrel and enhanced sweet spot
- Composite handle provides more whip and power
- Even weight distribution gives composite bats a balanced and light feel

PRICE-POINT BATS

Easton S250 1-Piece Alloy
 • 2 ¼ Barrel; -10 Drop
\$39.99

Rawlings RX4 1-Piece Alloy
 • 2 5/8 Barrel; -8 Drop
